OUR PASSIONS ARE YOUR COMFORT

A piece of furniture is never just a piece of furniture. Each indoor and outdoor design is the beautiful result of an extensive process involving hundreds of considerations. Behind every curve and angle, every textile, metal, stone, and polymer, behind size ratios and colour palettes lie the creativity and unwavering dedication of experienced professionals.

Explore collections of modern classics pivoting on intriguing design, impeccable functionality, and high-quality materials. Each piece reflects our devotion to making furniture and lighting an ever aesthetic, practical, and comfortable experience. And rightfully so.

Evoking deep feelings, furniture and lighting unavoidably speaks to the senses. Like constant sources of inspiration, shapes, sizes, and contrasts inevitably engender an emotional response. Consequently, the objects surrounding and supporting us constitute an essential share of our personal expression.

Whether as a declaration in the professional space or lovingly backdropping precious memorabilia at home, furniture, lighting, and outdoor objects reflects who we are, and what we communicate. To the outside world – and to ourselves.

ACORN

lamp

Designed by TOOLS®

Designed for an exclusive appearance the ravishing characteristic of the Acorn is its beautiful glass dome. With its industrial edge the Acorn lamp is reminiscent of an old-fashioned tube amplifier. Created to emit the soft, decorative lighting of a candle, Acorn will provide a mood enhancing glow for bookshelves, lounge and resting areas, cosy corners, or a bedside.

The dome is available in a dusty blue or a pearl beige. Complementing the texture of the shiny glass is a matte base and soft fabric cord. Delicate spiral filaments add an air of Danish hygge to the durable LED bulb with a lifetime of 20,000 hours - corresponding to 2.5 years if the lamp is never switched off.

YUUGA

chair collection

Designed by TOOLS®

Our take on a modern classic, the Yuuga chair is crafted from form pressed oak veneer upholstered with smooth leather. Oozing Scandinavian minimalism the Yuuga chair is reminiscent of the eponymous shell behind the design.

Feeling at ease frees up energy, and these understated designs will keep visitors comfortable for hours on end. This makes Yuuga chairs natural motivators in any space – around the dining or meeting room table, by the workstation, or in the living room.

Displaying subtle luxury, a collection of Yuuga chairs for the dining or meeting room creates a strong visual effect. Instantly encouraging moments of reflection and unwinding, the wide embrace of the lounge chair makes an unforgettable impression. The high bar stool adds sophistication to a kitchen island or workstation.

Yuuga chairs are an investment in life's most inspirational moments – in the company of inspirational others.

EMENDO

lamp collection

Designed by Hans Thyge & Co

Emendo is a collection of table lamps inspired by the majestic elegance of a tree. These sleek styles have been named after the design process: Denoting improvement, Emendo is all about optimising functionality and aesthetics. Accordingly, Emendo's timeless design has been stripped of all redundant features. The result is a fusion of poise and efficiency.

Created to serve your need for brightness at the desk, in the hallway, or on the bookshelf, the Emendo lamp is easily operated by a touch function on the base. Accommodating any atmosphere, the lamp is dimmable with three different brightness settings.

Emendo is available as a classic table lamp and in two smaller variants: A rechargeable lamp or with an enlarged base offering cordless recharging of your mobile devices.

DOSINA

chair collection

Design by THOMAS PEDERSEN

Inspired by the ethereal beauty of the dosinia clam shell, the natural elegance of the Dosina chair creates a calming atmosphere, whether in the dining room or meeting room. Indulge in simplicity with Dosina's clean oak veneer shell and powder-coated steel frame.

Well-proportioned bar stools for the kitchen island or office workstation will perfect a cohesive aesthetic expression. Multiple variations ensure that Dosina easily adapts to the size and design of the room and of the table which it complements.

Signifying serious business, armchairs add a touch of formality to the interior design. Leather seats constitute a textural contrast to smooth oak. Facilitating the need for extra chairs all Dosina styles are stackable.

SMILE

shelving system

Designed by TOOLS®

Smile is an elegant, modular shelving system designed to meet every need for display. Created with optimal flexibility and functionality in mind, Smile enables you to create bespoke shelf solutions tailored to match any type and size of space - from office hallway to living room corner.

The understated aesthetic expression of the Smile shelving system will bring attention to your books, boxes, and memorabilia. Easy to assemble Smile consists of removable powder-coated shelves in pleasant hues, supported by slender wall uprights crafted from natural or smoked oak.

The shelves curve towards the back, hereby gently preventing your favourite possessions from scratching. Shelves can be moved around the modular system without need for extra brackets or pins.

COMBO

chair

Designed by ARDE

The Combo chair makes a distinctive appearance. An almost sculptural design with organic elements suggesting tranquillity. Like hands interlocking, the lower and upper part of the back support each other and smoothly follow the lines of the person resting against it. This way, the Combo design ensures comfortable seating.

The Combo was designed to make life a little easier. The legs elegantly sway with the shape of the seat allowing effortless stacking. Available in three pure nuances and two upholstered styles the Combo will adapt to any space and environment.

TAFFEL

table

Designed by THOMAS PEDERSEN

Taffel is a collection of extendable tables hiding space for a good time. Suitably, the name is a Danish derivation of the Latin word tabula, meaning table or board. In Danish, taffel refers to a festive dinner. Taffel lives up to its name thanks to integrated extension plates, quickly enabling comfortable seating for a larger gathering.

With a tabletop crafted from plywood and linoleum the Taffel acknowledges the imperative need to include sustainable and organic materials in modern interior design.

Possessing an industrial edge with clean dimensions and stringent lines, the Taffel is a nod to the traditions of architectural functionalism. The table is light and slender, enhanced by its width of 90cm. This makes Taffel suitable for smaller spaces and as a desk. The higher version makes for an ideal workstation or even a room dividing meeting table in open space offices.

CARRY

TV stand

Designed by 3Part

We live in a world of visual nourishment. To many of us, the tv an essential part of home life. A social glue providing the entertainment for movie nights and binge watching among family and friends – and a source for solitary unwinding and regaining strength. The Carry tv stand was designed to facilitate any occasion for spending time in front of the flat screen.

The stand performs a decorative, yet very basic task. With its slender, tacit elegance, the Carry can be moved around as required. This allows for a more flexible interior layout than a wall-mounted tv. Offering wide support, the stand can be used for flat screens from 40" to 65". The screen is held in place by two stylish leather straps.

RADIANT

lamp collection

Designed by TOOLS®

With a name reflecting its ability to infuse light and warmth, the sculptural Radiant lamp creates a true Scandinavian ambience. Whether serving a relaxing evening of hygge on the terrace or balcony, or as a decorative light in the bookshelf or your favourite reading corner, the Radiant lamp combines decorative allure with contemporary edge.

All Radiant LED lamps are rechargeable and thus extraordinarily flexible. Creating an inviting atmosphere indoors, the design's characteristic wooden slats and base are highly durable, enabling the lamp to withstand everyday accidents at home among curious children and eager pets. The outdoor version of the coveted design is weatherproof and easily cleaned with slats in soft-coloured plastic.

Radiant lamps are available in three complementing sizes, all with three adjustable brightness levels. Indoor styles remain radiant for up to 33 hours, while the outdoor version will shine a light for 90 impressive hours on a single battery charge.

PHANTOM

sofa and armchair

Designed by TOOLS®

Inspired by the traditional conversation sofa, the Phantom collection encourages interaction. Originally, conversation furniture came to life when entertainment meant lively discussions with family and peers - and did not include tv or touch screens.

With its strong, clean lines and pleasant textures the Phantom collection was reinvented for modern living. An ideal piece for any minimalist interior setup the airy Phantom sofa and armchair will invoke a sensation of calm in a private office, waiting room, and lounge area - or simply any home.

The Phantom collection is crafted with legs and frame in solid oak, available in a natural oiled or softly smoked oak. Choose your conversation pieces among the collection's armchair, two-seater and three-seater sofa, and elegant two-seater sofa with built-in end tables.

SAVOYE

coffee table

Designed by ARDE

A symbiotic meeting between strict minimalism and soothing Danish hygge, Savoye tables aim to serve. Ideal as a coffee table, side table, or even a nightstand, a Savoye table will infuse any room with a sense of natural elegance.

Inspired by the breath-taking Villa Savoye designed by Le Corbusier, the Savoye table combines timeless beauty with modern functionality. The tabletop celebrates natural materials and is available in a durable ceramic or solid oak of different hues. The light and clear-lined frame is crafted from powder-coated aluminium.

The modularity of the Savoye collection is an irresistible invitation to make creative combinations between sizes, shapes, colours, and materials – to be selected and treasured according to your desire.

LAZE

lounge chair and footstool

Designed by ARDE

The impressive Laze lounge chair reflects our ambition to add comfortable coolness to the living room or private office. A minimalist design of supreme functionality, allowing you to curl up or sit straight - depending on purpose and disposition.

Featuring adjustable back and neck support Laze will adapt to any occasion - from silent moments of self-care to laid-back meetings. With subtle elegance a smooth leather strap enables multiple reclining positions. Add a matching stool for maximum self-indulgence.

MORE

table

Designed by ARDE

More is more. Particularly for an extendable dining table offering the option of extra length. Accommodating sudden guests, the More table is easily extended to larger proportions even while set with dinnerware, glasses, and your culinary efforts. To add more space for visitors around the table, simply pull out the butterfly leaf discreetly hiding at one end the table.

More may be more, but the minimalist design also proves that less is more. This lightweight, elegant design presents an oak veneer tabletop almost floating above the industrial frame.

QUAY

lamp collection

Designed by EVA SOLO

The right lighting is essential to setting the mood and bringing out a particular atmosphere. Bringing light contrasted by beautiful shadows the Quay collection is a proud representative of this claim. Elegantly understated, Quay lamps will have a defining impact on the interior decoration of any space.

Inspired by the comforting appeal of a dome, the sculptural Quay collection is instantly attractive with a modern and charismatic statement. These powder-coated steel styles complement any room with a perfect trinity of light, shape, and functionality.

Designed to be mixed within the collection Quay lamps make up an enticing, yet homogenous expression when arranged together. Select your favourite among floor lamps, table lamps, and pendants available in soothing, mutually complementing colours.

ROPE

mirror

Designed by TOOLS®

The epitome of Scandinavian minimalism the Rope design constitutes a simple, round mirror suspended from a clean-cut strap, cut from sturdy butt leather. A mirror is an indispensable interior accessory, whether as a functional item or a wall decoration for the hallway, bedroom, or bathroom. Adapting to any room or space, the Rope mirror is available in two, complementary sizes.

SUNLIGHT

lamp collection

Designed by TOOLS®

Nothing beats long evenings spent outdoor. SunLight lamps were created with the mesmerising beauty of Scandinavian light in mind. Designed for year-round outdoor use, these all-weather lamps are 100% solar-powered. As cordless designs they are highly adaptable - allowing you to move the lamps around according to need and desire for ambient lighting in the garden, balcony, or sundeck.

SunLight lamps are decorative and energy-smart. All styles have built-in, concealed solar panels and attractive practical features: Dusk-to-dawn sensor switching on automatically as the sun sets, and power-conserving automatic switch-off after 6 hours. At full charge the lamps will stay energised for up to 20 hours.

SUNLIGHT BELL

lamp collection

Designed by TOOLS®

Combining all the charms of a table lamp, a decorative object, and climate-conscious design, the SunLight Bell is a versatile solar-powered outdoor lamp. A day of sunrays gathered in an understated glass-led design, guaranteeing a sunny atmosphere all through the night.

The SunLight Bell is available in a small and a large model beautifully complementing each other, hereby creating a ravishing look in any outdoor setting – and in any number. Place a selection of different sizes on the dining table and around the garden or hang the frosted glass bells from a ribbon to add mesmerizing light to branches and bushes.

This simple design makes adjusting the need for light around the garden or the patio an easy task. The SunLight Bell is 100% solar-powered, but elegantly designed with concealed solar cells. After a full day of sunshine, the bell will provide up to 20 hours of light. Use the integrated dusk-to-dawn sensor to turn on the bell automatically at sunset.

SUNLIGHT LANTERN

lamp collection

Designed by TOOLS®

Make cosy garden nights last longer with an energy-efficient, simple solar lantern. The SunLight lantern distributes light in both upwards and downwards direction and will create a pleasant atmosphere in the garden, on the terrace, or balcony. The simple handle makes it possible to bring the light everywhere you go.

Designed for year-long outdoor use this solar lantern is highly durable. The lantern is 100% solar-powered and possesses several attractive features: Three practical brightness settings, dusk-to-dawn sensor making the lantern automatically turn on when darkness falls, and power-conserving automatic switch-off after 6 hours. Recharge the lantern in the sun or use the supplied mini-USB plug to keep your cosy lantern always close at hand. Fully charged the Solar Lantern lasts up to 20 hours.

Available in three different sizes, the SunLight solar lantern will infuse any outdoor environment with an ideal combination of Danish design, craftsmanship, and hygge.

FIRE PITS

Few things are cosier than gathering around a bonfire, unwinding in front of the soothing flames and intense heat. With sculptural aesthetics and outstanding functionality fire pits from Eva Solo are spectacular mood-makers and ravishing heaters for the garden or patio.

Cleverly designed with a wind-shielding effect, our fire pits are modern family hearths infusing your outdoor environment with a cosy atmosphere to be savoured among loved ones. Embracing the beauty of all seasons, nearly all fire pits are all-weather designs welcoming year-round outdoor use. Over time, natural weathering of Corten steel designs will add a distinctive patina to the pleasant appearance of the fire pit.

A fire pit can even be a source for memorable dinner moments. All fire pits from Eva Solo are available with optional steel grill grids quickly converting the fire pit into a barbecue. Simply place the grid in the pit, let the temperature climb - and you are all set to make a homecooked meal adorned with perfect grill marks.
